

# Wellness Stations

Introducing  
fully branded and  
configurable  
wellness stations.

## Custom Branded Wellness Stations

As we begin to return our employees and customers to the workplace and other higher traffic areas, we must consider the experience from the first point of entrance to the final point of exit.

This starts with the availability of hand sanitizer, wipes as well as disposable PPE. Image Options, an experiential design company, has created the Branded Wellness Station.

Ideal for offices, schools and universities, retail establishments as well as any other public venue, the IO Branded Wellness Station combines form and function for a fully integrated entrance/exit sanitizing station, creating a safer and welcoming environment as we begin to spend more time around others.

Contact us today to see how Image Options can customize a solution for you.
